1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β . It is shown that the system has solutions for all values of the parameters α and β if the function $f(x)$ is continuous and has a bounded derivative. The second part of the paper is devoted to a detailed analysis of the case when the function $f(x)$ is a step function. It is shown that the system has solutions for all values of the parameters α and β if the function $f(x)$ is a step function with a finite number of steps. The third part of the paper is devoted to a detailed analysis of the case when the function $f(x)$ is a continuous function with a bounded derivative. It is shown that the system has solutions for all values of the parameters α and β if the function $f(x)$ is a continuous function with a bounded derivative.
